

HEDIS Tip Sheet

Child and Adolescent Well Visits

Our HEDIS Tip Sheets provide resources and guidance to help your office improve its quality and QCP scores for important HEDIS measures.

Child and Adolescent Well-Care Visits (Ages 3-21)

<p>Tips to Improve Performance</p>	<ul style="list-style-type: none"> • If a patient comes in for a sick visit or a sports physical and is due for a well-care visit, try to complete all services of a well-care visit. Well-care preventive services count toward the measure, regardless of the primary intent of the visit. • Prioritize outreach efforts by targeting patients within the same household to achieve a greater impact. • Review all open care gaps for the patient and attempt to close all gaps (e.g., patients might also be due for an Annual Dental Visit). Additionally, review Jefferson Health Plans' member level reports in our provider portal to identify noncompliant members. • If the patient comes into the office as a walk-in, complete the well-care visit during that time. • Leverage Jefferson Health Plans' member incentive programs. • Partner with Jefferson Health Plans to hold block scheduling events. • Refer to the Bright Futures website for more tools and information for age-appropriate well child visits. The website can be accessed through the following link: Bright Futures (aap.org) • Consider developing well visit templates in your EMR that include age-appropriate assessments, screening tools and Best Practice Alerts that can help to guide your visit. Or consider creating a specific visit type in your EMR and/or Scheduling system that indicates that the patient is in the office for a well child visit. • If your office offers telehealth services, consider scheduling a telehealth well visit if that is the patient or caregiver's preference. Please use Place of Service 02 and one of the Telehealth Modifiers (95, GT or GQ). 		
<p>Measure Description</p>	<p>The percentage of patients 3–21 years of age who had at least one comprehensive well-care visit with a PCP or an OB-GYN during the measurement year. Note: Well visits completed by a non-PCP or non-OB-GYN do not count toward the measure. Telehealth visits will count toward the measure. Members who turn 3 years old during the measurement year are included.</p>
