RE: COVID-19 Update – Maternity Blood Pressure Cuffs

Dear Provider,

We hope that you and your staff are doing well during these unprecedented times. This is a follow-up to the communications we released on March 16th and 22nd, targeted specifically to providers who manage the care of our pregnant members.

We have created a COVID-19 page on our website at [HPPlans.com](https://www.hppplans.com). This page will be continually updated as new information is released by any of the regulators, CDC, or Health Partners Plans (HPP). We strongly encourage you to check this site routinely for the most current information regarding our members, plan, and employees. We understand the direction from state and federal agencies often change as the information and guidance surrounding COVID-19 evolves and we are also keeping updated so that our members can continue to have access to the care they need.

Pregnant Members—Blood Pressure Monitoring

For the continued care of our pregnant members while promoting social distancing, we are encouraging the use of self-monitoring for blood pressure in conjunction with outpatient and/or tele-health visits with you, their provider.

HPP has partnered with Integra Partners and Domtar Personal Care- HDIS, to provide blood pressure cuffs to your patients. Blood pressure cuffs will be sent to eligible members when ordered by their OB Provider. Providers need to fax HDIS, with these orders at **1-833-396-4663**. HDIS a division of Domtar Personal Care, will ship the blood pressure cuff, with operating instructions to the member.

Finally, please note that HPP remains in full operations at this time and our remote workforce is able to assist you and our members with all of the quality service you have come to know over the last 30 years. Thank you for your understanding and cooperation. As always, we appreciate our partnership with you to continually improve the health outcomes of our members.

Sincerely,

Michael K. Krusen

Michael K. Krusen
Regional Vice President, Provider Network Operations
